PROFESSIONAL EXPERIENCE

AI Automation & Full-Stack Developer | Son of Wisdom - Texas, USA / Remote **Apr 2025 - Present**

- Design and implement AI-powered business systems, automations, web applications, and technical workflows supporting coaching, sales, lead generation, member access, and internal operations.
- Led the technical migration and production rollout of AI coaching and sales-agent experiences using Delphi.ai, including persona architecture, access groups, prompt systems, testing scenarios, embedded experiences, and workflow planning.
- Built and maintained GoHighLevel workflows for lead capture, booking status, qualification, rescheduling, no-book follow-up, DND handling, notifications, pipeline updates, and cross-platform data synchronisation.
- Integrated iClosed, Commas/FanBasis, Frame.io, Google Sheets, Google Calendar, Discord, YouTube, and GoHighLevel through Zapier, webhooks, APIs, filters, loops, and custom mapping logic.
- Developed custom survey and lead-qualification funnels with HTML, CSS, JavaScript, conditional logic, early capture, webhook submission, custom-field mapping, responsive UX, and embedded calendar booking.
- Created an installable mobile experience for AI Blake using GitHub, Netlify, PWA components, service workers, device detection, and GoHighLevel tracking for iOS, Android, and desktop behaviour.
- Built production and reporting dashboards from Frame.io activity using Zapier, Google Sheets, Apps Script, KPI calculations, and embeddable front-end visualisations.
- Developed and supported an earlier AI coach architecture using Netlify, Supabase authentication/database, OpenAI models, Pinecone retrieval, Deepgram speech-to-text, and ElevenLabs text-to-speech.
- Produce technical documentation, deployment instructions, workflow maps, test plans, troubleshooting guidance, and implementation recommendations for leadership and operations teams.
